

To support our team in Hamburg we are seeking an experienced

## Full Stack JavaScript Developer (m/w/d)

in medical bioinformatics

**Indivumed** is a physician-led, integrated global oncology company for personalized medicine with the world's premier high-content tumor database and highest-quality biobank. Our range of services and products is tailored to customers' needs in translational and clinical research and molecular diagnostics. With approximately 200 employees across Europe, North America, and Asia, we are an internationally minded, future-oriented company with an ambitious growth strategy, which includes the development of a global cancer database solution. Indivumed is proud of our innovative team of leading scientists and of our strong international reputation. At Indivumed, you are given the rare opportunity to pursue your professional goals and benefit from quick decision processes – thanks to a flat organizational structure and ample creative freedom.

### Focus of our department

Integrative analyses of multiple data types facilitate a deeper understanding of molecular and epidemiological characteristics of cancer. With our work, we create the foundations for a modern data-driven cancer research and enable new future perspectives in patient care. Our interdisciplinary field comprises regular interactions with software developers, scientists, and physicians. You will work on joint initiatives and cooperations, but will also be responsible for the implementation of your own projects.

### Skills and abilities

- Development of user-oriented visual analytics tools and workflows for the interpretation of research data
- Development of mobile web applications for electronic capture of clinical data from cancer patients
- Usage of current technologies for the development of software applications for data analysis and visualization
- Support of the development of software modules for statistical analysis of high-dimensional data
- Evaluation and implementation of User Experience aspects on the software side
- Performance optimization of the visualization of large-scale data
- Interaction with a multi-disciplinary team of developers and scientists

### Our requirements

- Very good knowledge in the context of HTML5, CSS, JavaScript/TypeScript, Angular and Node.js
- An idea of microservice architectures based on Docker and Kubernetes
- Good relationship with DevOps topics like Linux Server, E2E tests, Git Flow, CI, Jira, Jenkins
- Experience with CleanCode
- Sustainable working attitude
- Strong communication skills and a high sense of responsibility
- Fluent knowledge of the English language, German is a plus

### What we offer

An interesting and challenging area of responsibility in a strongly growing international enterprise, an inspiring environment and short decision procedures, a highly motivated, cooperative and open-minded team, good working atmosphere as well as continuous training opportunities.

### Would you like to contribute to the success of our company?

Please apply online via [jobs@indivumed.com](mailto:jobs@indivumed.com) and include your salary expectations and current notice period.
