

To support our team in Hamburg we are seeking an experienced

IT Operator (m/w/d)

in the department of medical bioinformatics

Indivumed is a physician-led, integrated global oncology company for personalized medicine with the world's premier high-content tumor database and highest-quality biobank. Our range of services and products is tailored to customers' needs in translational and clinical research and molecular diagnostics. With approximately 200 employees across Europe, North America, and Asia, we are an internationally minded, future-oriented company with an ambitious growth strategy, which includes the development of a global cancer database solution. Indivumed is proud of our innovative team of leading scientists and of our strong international reputation. At Indivumed, you are given the rare opportunity to pursue your professional goals and benefit from quick decision processes – thanks to a flat organizational structure and ample creative freedom.

Focus of our department

Integrative analyses of multiple data types facilitate a deeper understanding of molecular and epidemiological characteristics of cancer. With our work, we create the foundations for a modern data-driven cancer research and enable new future perspectives in patient care. Our interdisciplinary field comprises regular interactions with software developers, scientists, and physicians. You will work on joint initiatives and cooperations, but will also be responsible for the implementation of your own projects.

Skills and abilities

- Operation and monitoring of IT resources in the big data field
- Transformation of already existing processes to cloud-based managed services
- Elaboration and implementation of backup concepts and assurance of the integrity of large-scale data
- Implementation and monitoring of security and privacy concepts for personalized data
- Monitoring of long-distance transfers of large data
- Interaction with a multi-disciplinary team of developers and scientists including support with appropriate developer infrastructure

Our requirements

- Education or university degree in computer science or equivalent
- Experience with cloud concepts, ideally with Amazon Webservices (AWS) technologies
- Experience with the administration of complex hardware as for instance High-Performance Computing (HPC) or NoSQL databases
- Experience with the security assurance of complex IT systems
- Knowledge of state-of-the-art big data technologies, for instance ElasticSearch, Spark, Amazon Redshift
- Knowledge of modern software development paradigms and tools
- Strong communication skills and a high sense of responsibility
- Very good knowledge of the English language, German is a plus

What we offer

An interesting and challenging area of responsibility in a strongly growing international enterprise, an inspiring environment and short decision procedures, a highly motivated, cooperative and open-minded team, good working atmosphere as well as continuous training opportunities.

Would you like to contribute to the success of our company?

Please apply online via jobs@indivumed.com and include your salary expectations and current notice period.
